

Title: VMWare Workbench Consultant -
Status: Interviewing IMMEDIATELY
Location: Bay Area
Salary: DOE
TERM: Contract, 4 weeks. Potential C2H

The VMWare Consultant position is a critical high profile immediate consulting role. We are looking for someone with **VERY SPECIFIC** experience to get us up and rolling with **VMware Workbench** and quickly train the Engineers how to use it. Workbench is the tool that VMware supplies to run your own hardware certification and it's very difficult and complicated to use. You **MUST** have experience setting up and running Workbench.

This role will specifically assist in getting the company's hardware **VMWare Certified**. They are looking to build an internal testing environment for both their current and future products. You must be extremely well-versed in this process as well as know the VMWare Workbench tool inside and out. **Excellent communication skills are a must**, as you will need to share and transfer your knowledge of Workbench to the technical team you will be working with.

You will be part of the latest and greatest technology in field of Solid State Storage. This is bleeding edge technology where the company is on a fast track to fame and fortune and has had numerous awards and accolades and huge media. The company has revenues in the pipeline for almost \$100m in sales alone for 2011.

You will be based out of the Mountain View office and will be working with a High Profile Executive Team that is very well connected and penetrating in Large Financial, Federal, Commercial, Service, Start-up and etc industries with their bleeding edge SSD Flash Memory array SAN appliance products. Toshiba has taken a stake in their manufacturing of flash memory* a very good indication that the company delivers product.

We are moving quickly on these roles. Please feel free to introduce and pass these reqs on to any of your peers that are interested in an Advanced Stage Startup that has been around for over 5 years and has existing large clients. They are poised to fall into an IPO and/or also on sights for acquisition in the next 2-4 years.
